

Hexagon 8-Stage Pi Water Purifier

“Living Energy” - Water for Better Health

π -Water is considered the most ideal water for the body. Known as "energised water", it gives a smoother, fresher taste and is just right for sustaining bodily processes. It also enhances detoxification and waste elimination, and helps to attain a healthy functioning body.

According to Dr Akihiro Yamashita, a professor at the Agricultural Department of Nagaya University, Japan, π -water is very similar to the water present in the human body, which has **Living Energy** or "energy for life".

Pi Water - Most Ideal for the Body

Smaller cluster structured water is the water preferred by living organisms. Snow water, water in fruits and vegetables, and water from deep pristine streams has highly energised structure.

- Dr Chun, Moo-Shik; Professor, Korea Science & Technology Institute

Water Facts

Our Body is 70% Water

"More than 70% of the human body consists of a fluid called Body Water. This is just not any water but specialised fluid that the body has processed into an acceptable form for use by our cells. Body Water is **different in its physical and bionic properties** compared to normal tap water. Healthy body water enhances our energy level and supports bodily functions, enabling our cells to work optimally for increased health."

*- The Miracle of Water
Makino Shinki, Ph. D, Prof Emeritus, St Marianna Medical College*

Water is Essential for Life

"Next to oxygen, water is the most important factor for the survival of man. The longer an individual goes without water, the greater the number and severity of diseases shown."

- Dr Olaf Mickelsen, National Institute of Health, USA

"Sufficient consumption of clean water has been shown to reduce the risk of certain cancers (colon, breast, bladder and kidney)."

- Real Simple, May 2001, Time Inc.

Tap Water

Chlorinated tap water kills bacteria. However, the chlorine compound changes the quality of the water, destroying its health-enhancing properties. Chlorine reacts with other contaminants in water to form harmful chemical compounds that could bring about various diseases.

When chlorinated water is boiled, chlorine becomes trihalomethanes (cancer-causing agents), which also react with any decaying organic matter in the water.

- Allen E, Banik. O.D. Your Water and Your Health

Underground Untreated Water

Underground untreated water is worse than tap water. You do not know the origin or the content of the water, and the likelihood of bacterial contamination is high. It is even more important to filter your drinking water to remove possible contaminants and pollutants.

Enjoy Better Health with Pi Living Water

Healthier Food & Drinks

Meats, vegetables and fruits that are washed and soaked in π -water are effectively cleaned, disinfected and hydrated. They stay fresh longer. Being smaller-clustered and energised, π -water also draws out the full flavour and nutrition of foods and drinks - letting you and your family enjoy more taste and more health!

Healthier Cells & Body

π -water is easily absorbed into cells and helps to maximise cellular functions. Cellular repair and regeneration is enhanced.

Healthier cells mean increased immunity, improved functioning and a healthier body. Skin, hair and nails become more moisturised and healthy-looking.

Compact 8-Stage Filtration System

1. Ceramic Filter

Made of ceramic material from Japan with consistent pore size of 0.3~0.7 microns, it filters away 99.99% of contaminants like sediments, sludge, rust and harmful bacteria.

* *Water-borne bacteria, such as E-Coli & Cryptosporidium, are larger than 1 micron in size.*

2. Ion Exchange Resins

NSF-approved ion exchange resins from USA adjusts calcium and magnesium content to soften your drinking water, rendering it softer and smoother to drink.

* *NSF - National Sanitation Foundation of the United States of America*

3. Activated Granular Carbon

NSF-approved activated granular carbon from Japan absorbs chlorine, odour and colour; making your drinking water chlorine-free, clear, and without offensive odours.

4. Mineral Stones

100% natural mineral stones infuse your drinking water with ionic minerals and trace elements. Water is mineralised, sweet-tasting and slightly alkaline to match the body's pH balance PH 7.2~7.5.

5+6. KDF + Activated Granular Carbon

NSF-approved Kinetic Degradation Fluxion (KDF), a zinc-copper compound, neutralises organic and inorganic mercury, trichloroethylene (TCE), trihalomethanes (THM) and other harmful heavy metals. Also inhibits harmful bacterial growth and preserves the pleasant, fresh taste of your drinking water. When combined with activated granular carbon, your water is totally purified at this stage.

Can Water Cure?

According to Dr F Batmanghelidj, founder of the Foundation for the Simple in Medicine and author of [Your Body's Many Cries For Water](#), water can actually cure.

He advocates **proper hydration to alleviate the following ailments**: arthritis, asthma, backache, constipation, irritable bowel syndrome, urinary problems, obesity, headaches, heartburn, indigestion, diabetes, high blood pressure, heart problems, high cholesterol, menstrual problems, morning sickness, stress and depression.

7. EC3000 Far Infra-red Ray (FIR) Energy Beads

Made of naturally FIR-emitting ceramic clay, the beads energise your drinking water, creating intense minute vibrations which break water molecules into smaller clusters that are easily absorbed into and used by our body cells. Water is energised for optimum benefit to the body.

8. Magnetic Stones

Magnetic stones create a magnetic field to further transform the water molecules into smaller clusters; producing Pi water with NMR readings of an average of 46~48 Hz, compared to tap water which has an average NMR reading of 120 Hz.

** NMR - Nuclear Magnetic Resonance is a method used to measure the size of water molecule clusters.*

Pi Water - Most Ideal for the Body

Smaller cluster structured water is the water living organisms like. Snow water, water in fruits and vegetables, and water from deep pristine streams has highly energised structure.
